

# Zuiver Afrikaans Water

**newsletter September 2015**

## **ZAW gift market**

Our gift market will be held on Sunday 22 November 2015. Look for some nice things to donate. Thank you Xindao and Bever for the articles you've already donated.

## **2400 pupils provided with clean drinking water.**

This summer water filtering equipment was installed for 1200 children at Majiya High School, thanks to a donation by sprout growers. Each classroom now has a container with safe drinking water.

Sibambisene Primary School was provided with clean drinking water with money from Kees van der Post and the remainder of Sjaak Langeslag's gift. The 675 pupils at this school start the new year with clean drinking water.

Our third project was at Mvutsheni Primary School where water filtering was installed for 525 school children.

All projects carried out by Qua Water assisted by Patty of SBO-network.

## **Zuiver Afrikaans Water logo.**

Have you seen our logo on jerrycans? It was designed by Marijke Jansen and the stickers donated by Rinja Repro.

## **Website**

Find more about these recent projects plus plenty of photos on our website.

## **Personal initiative**

All these projects in 2015 were financed by personal initiative - a wonderful gift that makes people both here and in Africa happy and has a permanent effect. Probably you too will have something to celebrate soon?
